

Fieldmasters Synthetic Grass is Lead Free

Fieldmasters Synthetic Grass is lead free. Every polyethylene, polypropylene, and nylon fiber that is used in manufacturing is lead free. Fieldmasters Synthetic Grass is working closely with yarn manufacturers to ensure that only the highest quality lead free yarns are used in the production of every style.

For years, Fieldmasters Synthetic Grass has offered a unique, 100% recyclable and lead free product line that provides superior performance, natural look, and environmental sustainability. Fieldmasters Synthetic Grass is the greenest artificial grass manufacturer in the world and is committed to producing the safest and most ecologically friendly synthetic grass on the market through tireless innovation and product development.
